-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. This application is a Continuation Application of U.S. Application Serial Number 10/126676 filed 4/22/2002, now U.S. Patent 6,712,924, which is a Continuation Application of U.S. Application Serial Number 09/721856 filed 11/25/2000 now U.S. Patent 6,530,339. An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification or in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)). The specific reference to any prior nonprovisional application must include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

2. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/721586, filed on 11/25/2000.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Kaneko (JP 01271368 A). Kaneko discloses a binding mechanism that includes a support structure that defines a floor (8) that is capable of adjustment and configured to be driven away from the

Art Unit: 3651

binding member (See Fig. 2); a wall that defines a stop (see Fig. 3); and a plurality of semicircular disc binding members (12) pivotally mounted with respect to the wall.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kaneko in view of Johnson. Kaneko discloses all the limitations of the claim, but it does not disclose a vibrating mechanism. However, Johnson discloses an apparatus for stacking and aligning sheets that includes a vibrating mechanism (60) for the purpose of ensuring proper alignment of all types of paper (see col. 1). It would have been obvious for a person of ordinary skill in the art at the time of the applicant's invention to modify Kaneko by utilizing a vibrating mechanism, as disclosed by Johnson, for the purpose of ensuring proper alignment of all types of paper.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
